**UNIVERSITY OF GENEVA**

The Neutrino physics group of the Department of Particle Physics (DPNC) has an opening for a

**Research Associate  
(Maître-assistant)**

Candidates must have a PhD degree in physics, appropriate experience in experimental Particle Physics, and a good knowledge of hardware and data acquisition. The position involves teaching duties in french.

The neutrino group is currently involved in the preparation of the T2K experiment in Japan and plays an important role in the Muon Ionization Cooling Experiment MICE. The selected candidate will rapidly take important responsibilities in the group.

Candidates should preferably be less than 32 years old. The initial duration of the contract is 3 years. The post will be attributed when an excellent candidate will have been selected. Candidates should forward at their earliest convenience a curriculum vitae and two reference letters to:

Madame Catherine Blanchard (Catherine.blanchard@physics.unige.ch)  
Secrétariat  
Département de physique nucléaire et corpusculaire  
24, quai Ernest-Ansermet  
CH-1211 Genève 4 SUISSE

Information concerning this position can be obtained from Pr. Alain Blondel ([alain.blondel@cern.ch](mailto:alain.blondel@cern.ch)) to whom it is recommended to address an electronic copy of the application.
